## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, Claims 1-8 and 16 in the reply filed on 02/27/2009 is acknowledged.

2. Claims 9-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 02/27/2009.

### ***Specification***

3. The abstract of the disclosure is objected to because it more than 150 words, exceeds 15 lines of text and is three paragraphs in length. Correction is required. See MPEP § 608.01(b).

### ***Claim Objections***

4. Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims ***have not been further treated on the merits***.

### ***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1794

7. Claims 1-4 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 3, the recitation “characterized in that functional ingredient contents are increased” renders the claim indefinite because it is unclear against what quantity the increase is being measured.

Regarding claim 16, the recitation “depending on germination time” renders the claim indefinite because it is not clear what depends on germination time.

### ***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

9. Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Hiroshi (JP 2003-159017-Patent Abstracts of Japan).

Regarding claims 1-3, Hiroshi discloses a food material or food obtained by germinating barley (Solution). Hiroshi discloses that the food material or food is enriched with alanine and  $\gamma$ -aminobutyric acid (GABA) (Solution). Here, alanine and GABA are increased by germinating the barley (Solution), i.e. controlling the conditions in at least one step during the manufacturing of the food material or food.

Art Unit: 1794

10. Claims 1-4 and 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Fujio et al. (JP 2002-335891-Derwent Abstract, Machine Translation).

Regarding claims 1-4, Fujio et al. disclose a foodstuff containing germinated wheat flour which is rich in nutrient content (Abstract). Fujio et al. disclose that germinated wheat grain comprises increased  $\gamma$ -aminobutyric acid (GABA) ([0003]). The foodstuff is manufactured by first immersing wheat grain in water and sprouting it ([0007]-[0010]). Next, drying the germinated wheat grain ([0019]) and grinding into flour ([0020]). Finally, incorporating the germinated wheat flour into foodstuff such as bread (Abstract), noodles, tempura, and baked goods ([0022]).

Regarding claim 16, Fujio et al. disclose tempura (i.e. fried food product) comprising germinated wheat flour. Fujio et al. disclose that said germinated wheat flour is made from wheat grain (i.e. wheat seed) soaked in water, germinated and dried ([0007]-[0010], [0019]).
